INTRODUCTION

Milele Agro-Processing provides a turnkey solution for harvested produce by processing to ready to eat and hence "Farm to Fork". The core focus for Milele Agro-processing is to create value for our stakeholders i.e. SME , contract farmers sustainably by bring the market to resources.

We have extensive experience in working with agri-business players across the value chain and have developed rich experience in tackling various issues facing the industry currently. Our expertise in tackling issues related to growth strategies, sustainability and operational efficiency has made us suitably positioned to deliver tangible value to our clients in dealing with cost pressures, partnering, sourcing and delivery capabilities & improving Food & Agribusinesses.

The company is 100% Black female owned & formed by Gloria Phekani.

ABOUT THE COMPANY

With unrivalled commitment to quality we are customer focused in the delivery of services to our clients including wholesalers, retailers and food service. The quality of our agro products is reflected in the quality of our distribution and after sales service.

OUR VISION

To be a catalyst for sustainable growth in Africa's food & agribusiness sector. Building businesses and delivering enviable returns while mindful of impacts on people and the environment – food and agribusiness investment with purpose.

OUR MISSION

Our mission of "Feeding Humanity, Sustaining Livelihoods" is to support small to medium scale farmers with business facilitation and local value chain development whilst at the same time ensuring household food sufficiency.

OBJECTIVES

Through supporting community projects, we seek to achieve the following objectives:

- Increase agricultural production for small to medium scale farmers
- Increase production and consumption of a wide variety of foods
- Capacity building small to medium scale farmers with business facilitation and local value chain development skills
- Agro-processing and value addition of products

OUR AGRO PRODUCTS

From Farm to Fork

PROCESSED
PEANUTS

GROUNDNUTS
CG7

MICHIGAN
BEANS

LONG GRAIN
RICE

Our strategically positioned shelling, grading, importing and warehousing facilities - help us deliver a consistent supply. Local warehousing in Malawi & Johannesburg enables us to be a reliable partner to consumers such as factories and the local markets.

Groundnuts CG7 processing

We offer the Processing of Groundnuts before distribution to the retail market. Blanching, cleaning and roasting for peanut butter.

Our Product Quality

We focus not only on quality by itself but strive to redefine the benchmarks of quality. We strongly believe that our competitive edge comes from pursuing innovation and striving to set the industry standard for quality.

COMMUNITY DEVELOPMENT

Our commitment to sustainability and community is integrated into every part of our operations.

We engage in contract farming partnerships to support small and medium scale farmers to improve their livelihoods. This is in line with the World Food Programme's purchase for progress principles of supporting farmers to grow more, sell more, and earn more and become more competitive players in their local markets.

We view the community and our suppliers as key stakeholders to any investment and our objective in this regard is to empower these respective stakeholders from an educational, economic and social welfare perspective.

CONTRACT FARMING

Farmer Out-grower schemes

Our vast know-how and experience at your service

- Agricultural operations & Management of farms - using our vast know how to produce and sell to the local and international markets.
- Industrial facilities and logistics centres - produce processing technologies and packing houses are part of our agro-industrial capabilities.
- Agriculture guidance and training - Conducting professional training seminars (agronomy) for local farmers and creating a training concept to secure long-term steady increase in product.
- Agriculture R&D - Using our in-house technology and know-how to create innovative agro-farming research stations and laboratories to forecast the future of farming.

WAREHOUSING & DISTRIBUTION

The quality of our products is reflected in the quality of our distribution and after sales service.

It is just as important to us that the product reaches you in good condition and in a timely manner as to the quality of the product itself. You can be sure that we will exceed your expectations and be the perfect partner for commodities sourcing, supply and after sales customer service, We currently occupy new and modern warehouse facilities located centrally in the heart of South Africa - Johannesburg & Lilongwe, Malawi, giving us access to all major roads and motorways and the ability for fast and efficient turnaround on delivery of products.

We have a rapid supply chain capability to the whole of South Africa and its SADC neighbours.
